

## **CST Composites New High Modulus Wing Bars For MACH 2 Moths**

Due to high demand for stiffer Mach2 rear wing bars, CST Composites has just released a new High Modulus upgrade.

CST rear wing bars are designed to fit straight onto the existing boats and come with re-enforcing at hull and acetal end caps. The new bars are substantially stiffer while maintaining similar weight.

The CST wing bars are available from CST Composites with a retail price of \$510 AUD + taxes. For more information contact [sales@cstcomposites.com](mailto:sales@cstcomposites.com)
